Information Visualization for Prescription Drug Monitoring Program Data

This research was supported by grant T15LM011271

About Me

Bolarin Lawrence

- Second Year at UC San Diego
- Nanoengineering Major with a Biology Focus
- Interest in the pharmaceutical industry

Opioid Crisis

The Opioid Epidemic has been a **major medical issue** in the United States for decades.

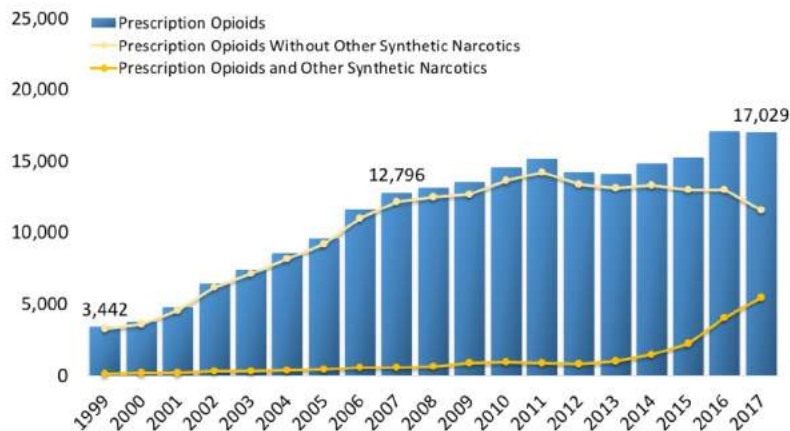

- The National Safety Council stated in their 2019 report that Americans are **more likely to die from opioid overdoses** than from car crashes (Bursztynsky).

There are **two types of opioids: prescription and illegally obtained**. A patient, however, can become dependent and addicted to prescription opioids.

- Individuals who become **addicted** may schedule their lives around these drugs, prioritizing them over other activities.

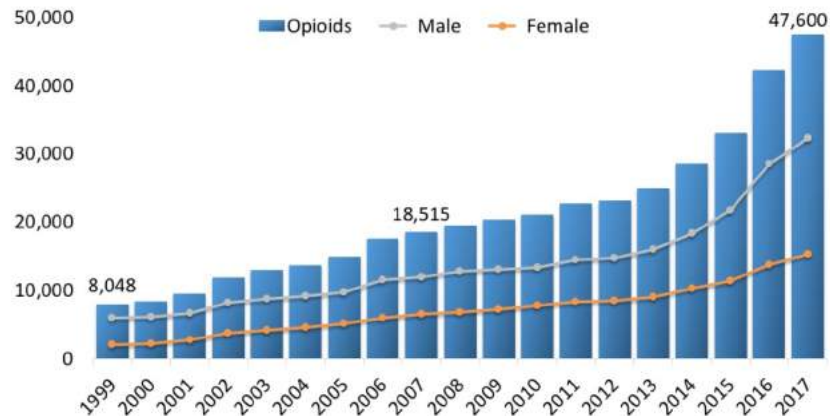

National Drug Overdose Deaths Involving Prescription Opioids, Number Among All Ages, 1999-2017

National Drug Overdose Deaths Involving Any Opioid, Number Among All Ages, by Gender, 1999-2017

Source: : Centers for Disease Control and Prevention, National Center for Health Statistics. Multiple Cause of Death 1999-2017 on CDC WONDER Online Database, released December, 2018

Source: Data compiled by the DEA and CDC and analyzed by The Post

The background of the slide is a deep blue gradient, transitioning from a darker blue at the top to a lighter, teal-like blue at the bottom. Overlaid on this background is a complex, abstract network of thin white lines connecting small white dots. These dots and lines form various geometric shapes, including triangles, quadrilaterals, and larger, more irregular polygons, creating a sense of interconnectedness and structure.

So how do we solve this?

A change in how doctors monitor patients needs to occur!

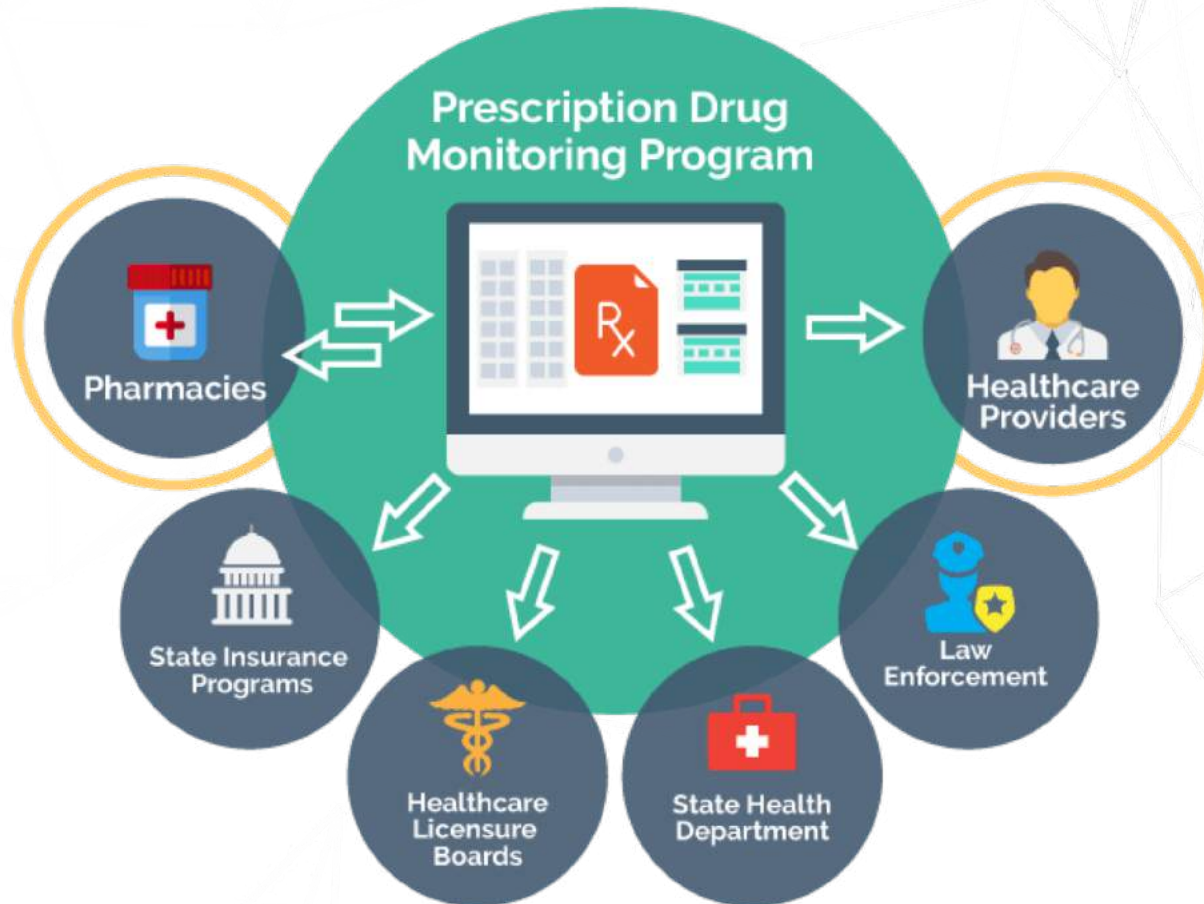

What we have currently!

Prescription Drug Monitoring Program (PDMP)

- A program created that promotes public health by identifying the misuse of prescription medications.

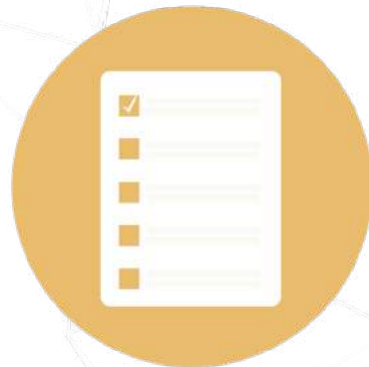

Controlled Substance Utilization Review and Evaluation System

- A PDMP platform for controlled substances in California.
